

Project Profile

Soft strip out of M & E Services to ceiling void on 4th floor of occupied office building.

Key Works Completed

- M & E services to ceiling void
- WC areas
- Working in between 2 Occupied Floors
- Close co-ordination with other trades working directly behind us to re-fit new M & E and Raised Floors
- Noisy Works carried out at agreed times to minimise disturbance to other tenants.
- Waste stockpiled neatly in cordoned off areas on site due to limited times for waste removal and co-ordination with other trades deliveries.

Client

TSK Ltd

Programme

2 Weeks with all works completed on programme

Size & Value

37500 Sq ft - £50000.00

Waste Removed

100% of all 36.2t of rubbish was recycled.

Client Feedback

"I thought it worthy an email by way of expressing our thanks and appreciation to the way your guys have performed on this project. Every aspect of what you have been contracted to do has been done in professional and diligent manner. Your paperwork, H&S and general attitude on site has been nothing short of exemplary. Ben, your supervisor has at all times ensured your guys have been kept under control, the site has been kept as tidy as possible for a demolition job and kept us informed all the way on progress.

It's been a genuine pleasure working with your team"

Craig Boam - TSK, Project Manager

"Its great to hear another new client is happy, especially on a project that posed some real logistical challenges, but nothing that couldnt be overcome with clear communication" - David Brennan, Lawmens Project Manager
