

Project Profile

Demolition of 5 small office units to the rear of a warehouse to make way for the development of five new town houses.

Description of Works..

Due to the small and intricate nature of these works and the units being tied in to the existing warehouse, the majority of these works were completed by hand. Initially we completed the Asbestos Removal works, followed by the soft strip out works, separation works and finally the break up and removal of the floor slab, leaving the area ready for the new development.

Project Summary..

- 3 Week Programme
- £35,000 Project Value
- Asbestos Removal Works
- Soft Strip Out Works
- Sympathetic Separation works using hand tools
- Demolition of Units and grub up Floor Slab
- Works Completed on time and in budget
